

Life Science Enrichment Workshop: 2-Day Junior Forensic Scientist

The Life Science revolution is here. Give your child a head start!

Rapid advances in the field of the life sciences are impacting our health, food, laws and ethics and will fundamentally change the way we live and work. Our children need to learn these new skills and stay competitive! Genecet Biotechnologies is proud to present a series of Life Science workshops exclusively for Primary 3 to 6 students. Conducted by our experienced consultants, these workshops consist of outdoor experiences as well as experiments.

PROGRAM OUTLINE:

2-Day Workshop 9am - 6pm:

Students will take on roles of CSI detectives where they will analyze and examine various evidences to piece the series of events together and recreate the crime scene. Students will be guided throughout the investigation process by maintaining a peripheral view of the crime scene, evidences and suspects. Students will perform hands on activities to experience the real life attributes of a Forensic Scientist. Students will also engage in brainstorming sessions just like how the real CSI detectives do it!

Program Highlights are:

- Students will investigate a crime scene based on a true story
- Students will be taught how to extract DNA and analyse a DNA gel profile
- Students will be introduction to Blood typing analysis will be implemented
- Students will get hands on experience in performing Ink Chromatography

Please tick the type of programme and date you want your child to enroll in:
